Assessor Comments	26 X 26 Speckle park/Friesian heifers with Angus calf at foot. These quality young vealer mothers all calved unassisted over a very tight four week period and are producing great amounts of milk for the sappy young calves at foot. Heifers are ex very large frame Kerrick Park Friesian cows sired by Blueridge Speckle park bulls resulting in a good style of female that have frame and shape in the rear end with maternal instinct and milk production to go with it. Young outfits that are trained to the call and rotationally grazed with all matching number management tags for easy mothering. Great young females that have been very well looked after and present in excellent condition post calving ready to slide into any top end veal program and your choice of bull with many years production ahead of them..
