	Cows were unsettled on the weigh platform but very good to flow through raceway and quiet to handle through yards. Assessment day was first of warm days for spring and calves were separated from cows so a little unsettling is normal. Would run through open gate if allowed but easy to pull up and cows were wanting to get back to calves. In the paddock cows would all approach the vehicle and lick the tray. Easy to walk through the mob for photos and cattle would stand and be comfortable.

Assessor Comments	Presenting some genuine breeder cows and calves surplus to needs with feed going forward. This line represents a straight line of spring calving cows and is the whole line of spring calvers. Majority 2022 & 2021 drop. The red tags are on their first calf and had a hard time over summer as many regions did, they have bounced back very well on the spring feed but lack some frame size of the older drops due to season. Noted 4 clouded/white eyes in the yellow tags not causing issue. Calves are fresh and young, unmarked but will get EID tag before delivery. Genuine sale from reputable large scale breeder and finisher.
