Assessor Comments	On offer are 19 maiden first-calver Angus heifers. These heifers have an average live weight of 470 kg at assessment. They have been pregnancy tested by Andrew Robinson on 22/10/2023, finding 19 head 4–6 months in calf and 1 head 7 months in calf. These heifers are ideal future breeders, with youth and time on their side, and their whole breeding life ahead of them. These are breeders you will have for a lifetime. They have been joined to low-birth-weight Trangie Reasearch Angus bulls and will suit any Angus breeding herd.
