Notable Traits	Traits 3 Head White belly/ udder		
Assessor Comments	A line of 36 EU Murray Grey PTIC cows which are part of a complete dispersal due to leasing of the property. The herd was established in 2011 from F1 Murray Grey cows using Murray Grey bulls ever since so there is a small influence of those traits remaining in the herd. These cows are as quiet as you can get and are a treat to work. The herd present in strong forward store condition and with an average liveweight weight of 663 kg these cows are of a large frame and quality. Calves were weaned off cows on the 21st of August and the cows have freshened up well. For the past seven years the vendor has been buying Arki and Beeamma bld bulls, buying from the top end of the sale with EBV's of birthweight, growth and structure being a focus.
