Vendor Bred: No
Vendor has owned stock for 2-6 months

Stock History: Purchased a line of one brand cows and calves and PTIC cows from Western Qld early winter, these being the weaners off those cows.

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Bloodlines: Purchased as a line of Angus & Santa x cows & calves and PTIC cows from Western Qld. Calves sired by Angus, Ultrablack & Santa bulls.

Grazing Conditions: These heifers and their mothers have been grazing in very short dry Buffel and natives with some legume. Very dry seasonal conditions has forced the early weaning/sale of these weaners to give relief to the cow.
Returned to: Buyers please note these heifers will remain in the yards on good hay and weaned until delivery.

Burr/Seed in Coat: No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status: The owner declares that the cattle have not been treated with HGP at any period of their lives

Buyers these weaners were a pleasure to draft , assess and handle. As they were purchased as cows & calves from Western Qld in early winter, they have been trucked, travelled and handled extensively in their short lifetime. I have full confidence they will be quiet and easy to handle moving forward. Only a small handful stirred up in the crush when getting the Cydectin needle which is to be expected for a calf fresh off the cow.

Handled With	Bikes , Dogs , Horses , On foot , Vehicles

Assessor Comments	Buyers please consider this line of 44 (1 deck) soft weaned heifers. Weighing from 150 - 233 kgs to average 203 kgs at assessment after an overnight dry curfew. These weaners are off a line of quality Western Qld Angus & Santa x cows purchased as units and PTIC cows in early winter this year. Only selling at this age due to the very dry seasonal conditions and to give relief to the cow. These soft heifers would make ideal backgrounders for the feedlot market or carry on and finish. They have been pre treated with Cydectin LA injectable to help with movement into tick free areas, they were visually clean of adult tick at assessment. Buyers please refer to my photos and videos as part of my description. They have had extensive handling in their short lifetime and were very good & quiet to handle. Buyers please note the vendor has 44 steers (1 deck) brothers to these heifers in this same sale.
