| Assessor Comments                     | A mostly good to very good quality line of vendor bred Angus and Angus Cross heifers. Heifers were yard weaned in several mobs from March to May 2024 and worked through the yards and educated to hay racks throughout the weaning process. 68% Medium framed, 18% large framed and the remainder small framed. All are sired by Hazeldean Angus bulls with the full sire list provided. One heifer has a small amount of warts around the eye, not seen as detrimental. All heifers received first dose of 5 in 1 at branding from December - January & received the 2nd dose plus Ivomec backliner at weaning from March - May 2024. Heifers have not had access to grain or cotton seed and would suit to take to feeder weights for a range of high quality markets. |                                     |       |                 |                |                                           |                                     |           |     |      |     |       |     |
