Heifers were well behaved in the yards and force, and mostly in the crush. Some just wanting to push up in the race, and rush through the process. Which had to be pushed back to ease pressure off the slide gates. Once in the crush, they were

	much more settled, and the majority were all very settled walking out, none taking off with their head up, just calmly wandering out as per video. Heifers that have had a good start & will only improve with handling & age.

Assessor Comments	Young, well bred line of 13 month old Rennylea/Ardrossan Angus blood Heifers to take on. Well structured, high growthing heifers that are 100kg+ lighter than they would usually be at this age, and offer the successful purchaser some fast and immediate compensatory weight gain on delivery. Heifers that would usually be grown out to feedlot specs, however the tightness of the season has not allowed these heifers to reach anywhere near their potential, and in return, offers the buyer the chance to quickly finish what's been started, with a huge amount of frame to work with. Ideal lot of Heifers to Back ground in the Spring, then finish on a grain ration for a Supermarket program.
