Assessor Comments	The top draft of the 'St Omer' February/March drop Angus weaner steers. Steers are full Murdeduke blood with sires being selected for their growth, fats and IMF. The 'St Omer' cattle display length, depth of body and overall capacity. The steers were fully yard weaned for 5 days and are exceptionally quiet, with steers trained behind two electric strand fencing. Steers have been achieving impressive ADG since being weaned and would continue to flourish. Ideal to grow to either feeder or slaughter weights. Vendor has an additional lot of steers in same sale.
