Assessor Comments	Due to the property being sold, these ptic cows are being offered for sale. Normally they would be keepers. They are a tight age group of 2020 to 2022 drops, and have been preg-tested in calve for 2 to 5 months, making them March/April calving. These cattle have always been very carefully managed for temperament, and that quiet temperament shows in these cows. This is a commercial mob out of the Tooperangus Black Angus stud, running on the neighboring sister property. These cows weighed 507 kg curfewed at the time of assessment, and will present in strong store condition. They have been vaccinated with 7 in 1, and drenched with Neove. This same vendor will have two other lines in this sale. There will also be a small line of 9 empty cows in the same age group available for sale at 417 kg, to the purchaser.
