Any Access To Rams or Stags?	To vendor's best knowledge, the female portion of this lot has had no access to rams or stags.		
Assessor Comments	400 Dorset x Composite store lambs. July/Aug drop, weaned 10/10, all weighed over 30kg to av 36.2kg full. Drenched and vaccinated at weaning. supplemented wheat & beans 3 times per week. There are 2000 lambs in total which will be split into 5 lots of 400. They are the tops of the drop and are only being sold due to the season cutting out. They are bred out of large Cashmore Oaklea composite ewes combined with the Derrynock sires the Terinallum lambs perform year in year out. There are some lambs that have a little bathurst burr on them (see photos). I noticed the odd lamb at assessment did have some scabby mouth. Majority of the lambs are 33-42kg however there is some heavier lambs through them as no tops have been removed. At assessment they were averaging 280g/day weight gain since weaning. High quality lambs.
