| Vendor Comments              | We would normally retain these young lambs for the trade market, but due to tightening conditions through winter and early spring have decided to sell early.                                                                                                                                                                                                                                                                                                                                                                                                          |            |                      |             |

| Assessor Comments            | Offering a four deck load of store lambs that are perfectly positioned for quick weight gains going forward. All lambs are fresh, well weaned and run extremely well at assessment. Please note this 425 are the lead of 950 lambs. All lambs trained onto Barley which will help feedlot entry enormously. The Stevens Family purchased young ewes off 'Romani' 3 & 4 years ago to commence their Primeline flock and have been purchasing top grade Primeline rams off Lambpro ever since. These lambs really do show the results of that strong genetic background. |            |                      |             |
