Assessor Comments	600 Australian White wether lambs, August/September 2024 drop, weaned and tagged at Assessment. A tail was taken from the draft and there is approximately 10% by the Meat Master rams. These lambs are ideal to grow and fatten into trade or light export markets. They have been running on St John's wart country with approximately 10% showing signs of photosynthesis on ears and face. At assessment they will be moved onto country free of wart until delivery and normally will heal up in 2 weeks. Please note 4 day delivery before Christmas. With a strong lamb market at present and looking forward, good summer feed conditions and ideal lot to fit on 4 decks they offer a great short term cashflow opportunity.
