Assessor Comments	A nicely presented draft of Merino wethers in principally forward condition. Wethers are well grown with sample mouthed being 4T. The Strathallan operation has been sourcing genetics from Mount Yulong & Gelton Merino studs for a number of years, producing principally medium frame, plain bodied merinos cutting around 5-6kg fleece wool at around 18.5 micron. A great chance to acquire a nice line of young woolcutters that will finish to export weights.
