	The steers flowed well through the yards and through the crush well. The odd steer would stir under pressure in crush, however settle once back in the mob.

Assessor Comments	192 VGQ Droughtmaster & DroughtmasterX No.3 and No.4 HGP FREE Steers. These steers have been bred from large framed Droughtmaster and DroughtmasterX Cows using good quality Droughtmaster bulls. The steers are medium and large framed and will grow into heavy feeders or grass fed bullocks. After being in the yards for 24 hours the steers were assessed and weighed into a tight weight range 280-380kg to ave. 337kg. There is approx. 181 No.3s and 11 No.4s in the mob. They are in strong store condition and present with plenty of compensatory gain to be had by the successful purchasers. The steers were good to handle through the yards, with the odd steer stirring under pressure, however settling once back in the mob. Ideal steers for the domestic feeder market or grow through to heavy feeders or grass fed bullocks.
