	Ok to handle through the race and crush. Three heifers noted as slightly stirry would not settle fully while in the crush and exited quickly. One heifer did not like the pressure while photos and videos were being taken in the yards and would move away quickly. Noting aggressive - they just need some space.		
Handled With	Bikes		
Assessor Comments	A line of good through to very good quality vendor bred Angus and Angus x heifers. They are medium to large frame heifers which are sired by bulls from Texas, Eastern Plains and Bald Balir selected on structural soundness, growth and carcass traits. They were yard weaned in March and have been educated to hay racks and feedlot troughs. One heifer noted with rear white underline. They suit to take to take directly onto feed for the domestic market or to grow out and finish for a range of high quality grass slaughter markets.
