Heifers flow and handle well through yards and assessment process. Some were slightly agitated when drafting with new person in round yard. Walked very well through race and all stood calmly on scales.

Assessor Comments

25 March/April drop Angus heifers. Weaned, Vendor bred, grass fed only, drenched Ivomec injectable in October 2x5in1. Heifers are from a great herd of medium to large framed cows originating from pathfinder bloodlines with these calves being sired by Harris farm Angus bulls. Well bred young cattle that present in good store condition and given the opportunity will continue to perform and are ideal to take on to any desired weight or would compliment any breeding operation.
