Notable Traits	Traits 1 Head Slight eye scarring in one eye- Not detrimental 3 Head White patch on or around udder		
Assessor Comments	Well bred line of NSM Heifers. They are well grown for their age and exhibit all the quality traits the breed desires. This line represents the 2nd group for the total drop with no females to be retained on this farm. All heifers were weighed at assessment then any off types were removed from the group to present a nice tidy line of females. They stand evenly as a group, carry a clean bill of health and are in slightly forward condition. Great opportunity to put together a b double of one mark heifers if desired. Heifers exhibit plenty of quality if you should choose to class up and join to a bull of your choice. Alternatively would feed onto to heavier weights without carrying too much condition. Heifers are soft feminine types and would compliment any operation. Note small amount of ringworm/wart in small percentage of mob. Please note vendor also offering a similar line of heifers another nearby property. Please call for further information
