	Mustered in a large mob to a relatively small set of portables in a congested environment yet very well and expertly handled with very good stockmanship the heifers flowed through the race and crush very well. A very small number could potentially become agitated if they were to be isolated. Heifers settled well when returned to the mob. Cattle were turned out directly after assessment with bikes and left the yard quietly.

Assessor Comments	Buyers a great opportunity to purchase a very good quality line of ORGANIC USDA, NOP and GAP certified heifers that will suit organic producers to bump up their breeder numbers. These heifers presented in mainly store to forward store condition and demonstrated plenty of breed character and maternal traits. We are receiving very positive feedback from major feedlots in relation to the performance of the steer portion on grain. Very quiet to handle when being yarded and also on exit from the yards. These heifers have just received rain however were grazing in dry conditions. These heifers are ready to go forward to fatten or join. please note there is some fly scar present on some heifers.
