No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status

The owner declares that the cattle have not been treated with HGP at any period of their lives

Chemical Residue

Clear - No known history.

J-BAS Score

6

Vendor Comments

A good run of ORGANIC Ultrablack cross steers that are showing plenty of frame and no excessive condition. These should really bounce ahead on either crop, grass or on feed. Only mouthed a No2 steer (early 2 tooth).

	Mustered to a relatively small set of portables in a congested environment yet very well and expertly handled with very good stockmanship the steers flowed through the race and crush well. A very small number were aggressive or agitated when confined or isolated yet settled well when returned to the mob. Cattle were turned out directly after assessment with horses and bikes and left the yard quietly.	
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses , On foot	
Assessor Comments	Buyers a good to very good quality line of ORGANIC USDA, NOP and GAP certified steers that will suit all export feeder and/or organic programs. These Ultrablack steers are noted performers on either crop, grass or grain. They present in mainly store to forward store condition so as a result I would expect plenty of compensatory gain given the right feed conditions. Buyers please refer to the videos and photos for full and accurate breed description. Also noted the odd steer with a small amount of fly rub on the neck and face. Note there are multiple lots from Terrick in this sale, all 1 brand.	
Assessor	Nick Handley (Level 2 Accredited) Phone: 0428 581 001
