Vendor Comments	These are part of a normal annual turnoff. These were very good to handle on horses whilst mustering for assessment. These are just starting to hit their straps now that it has rained. We have tried to offer in as tight a weight range as possible.

Assessor Comments	Buyers, here is a B-Double (96) PCAS ELIGIBLE yearling steers that have been drafted into a reasonably tight weight range. Present in mainly store condition they will offer buyers great compensatory weight gains when introduced to crop, grass or grain. Note they also had a big sweat in the yards prior to assessment further emphasizing compensatory gain. There is plenty of frame just no condition so it shouldn't take long to get them to heavier export feedlot entry weights or take all the way to bullocks off crop. Steers once again exhibit softness, good bone, length, depth of barrel and weight for age considering the dry seasonal conditions up until the end of October, they look to be on the move now. The vendors are not frightened to spend money on the right genetics, always looking to move their herd forward and not just mark time. Steers don't look to have suffered any setbacks at any stage. We are receiving excellent feedback from past buyers about their performance.
