	Cattle were very good to handle in the yards and crush. Four steers just would not fully settle or exited the crush quickly. They settled quickly back in the yard and were calm and settled while moving from yard to yard. See videos.

Assessor Comments	A good to mostly very good quality line of vendor bred yearling steers. They are 35% medium and 65% large frame steers that range from Angus through to a soft Angus cross. They suit to take to take directly onto feed for a range of high quality export or domestic slaughter markets. They have not had access to grain or antibiotics and are eligible for grass finishing programs. They have had an extended period on oats and are now grazing oats stubble and fresh improved pastures. This is the heavier end of this years steers with a lighter deck also in this sale. Two steers noted with a slight blue eye in one eye - not considered detrimental. They are located just south of Coolatai on the Warialda Rd and are easily accessible for any carriers running north and south. Note the liveweight purchase option available during the sale.
