	The Temperament of these steers is accredit to the vendor, these steers are free flowing through out the yards with minimal fuss, as expected for young cattle there is the odd steer when put under pressure will react but overall good to handle. I did not handle these steers in the paddock but observed them walked away with a side by side and dogs.

Steers display great weight for age and as shown in the photos these steers are right on the turn dropping there coat and starting to power along. These steer will excel in the future as grass feed feeders right through grass/grain fed both domestic or export slaughter steers.
