Assessor Comments	Here is a line of crossbred steers showing plenty of frame and compensatory weight gain. These steers were purchased as young weaners. The majority of steers were purchased in 2 lines. The season where these cattle have been depastured since there purchase has been very ordinary. These steers will take off on better quality feed. The steers handled well throughout the yards with no problems. Please not these steers were bred in cattle tick infested country before being cleared into cattle tick free area where they currently reside. If you are looking for lightweight steers who are going to really take off on good feed then these are the ones.
