Heifers flowed well through home yards while being worked by vendor quietly during assessment. A % of heifers became			

unsettled when confined in crush but were quick to resettle once released back into mob. (1 heifer became very unsettled in crush) Heifers tended to stay mobbed up during photos with a few heifers wanting to trot around yard which made balance want to do the same.

Assessor Comments

Buyers, a line of 19 vendor bred Charolais cross heifers presenting in healthy store condition to have an estimated average delivery weight of 240kg. Heifers would be ideal to background for the feedlot market of your choice, fatten on crop or a large percentage also would be suitable to retain as future breeders. Please note: Delivery dates flexible if potential purchaser is affected by wet weather. This vendor has 3 sister lots in same sale.
