Assessor Comments	Six decks of 168 vendor-bred steers, HGP FREE, with very big weight compensatory gains. Following a 24 hour curfew, being drafted through the pound the steers were weighed into a tight weight range of 300 to 418kg to Av. 353kg. Of the steers sampled, 93% were found to have milk teeth, with #3 steers milk teeth and #2 steers 14hd milk teeth and 2hd having 2 teeth. These steers were very well handled through the yards during drafting and assessing. Please note some photos have been taken the following morning being 38 hours off feed and having 16mm of rain that night. Coming from a composite herd these steers are by Droughtmaster, Charolais and Angus bulls, however 15 head do have more brahman type and slight humps.
