|                               | Stirry: 5 head                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                          |                             |
|                               | Heifers flowed through the yards & up the race well. Odd heifer stirred under pressure in crush and small yard but settled once back in mob. Heifers need steadying through gate ways but are quiet in big yards.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                          |                             |

| Assessor Comments             | 77 PCAS eligible Ultrablack & Santa X heifers that are PTE or non-detectable in store condition and are best described as medium to large frame. Heifers show all the right breed characteristics with good bone, plenty of length & softness throughout this line. The 'Thylungra' herd are known for their fertility & performance having preformed very well on both grass and grain. This line would suit both future breeding or feeding. Buyers please note all heifers were mouthed at assessment with 92% 0-2 teeth and 8% 4 teeth. Purchaser should see very good compensatory gains putting them on fresh feed as heifers have plenty of frame. At assessment 1 x head noticed with some skin irritation around neck from flies. Please note vendor has 75 PTIC heifers in Eastern States Sale also. |                          |                             |
