Some steers did react negatively whilst in the crush and weigh box. Any steers that stirred up in crush and race settled once they were back with the mob. These steers were fresh and did move freely through the yards and would require more handling to change behavior.	
Handled With	Bikes , Dogs
Notable Traits	Traits
	3 Head Blue eye scarring
	1 Head Lump (vaccination lump)
Assessor Comments	Buyers opportunity knows to purchase a very good quality line of EU accredited Angus steers that would suit feedlots feeding for the domestic or export market or backgrounders looking to grow out to heavier weights. These steers are in forward store condition and are just starting to move on the green feed they have had in front of them. It must be noted that the feed was dry up until 3 weeks ago and the green feed is running through the steers. These cattle have a reputation for performance and will expect the buyer to get some good compensatory gains with the condition these present in.
