This mob of heifers had a couple of free moving types in them when worked through the yards but in general weren't too bad. So heifers got agitated whilst being assessed in the headbale but settled back to normal when let go. I helped walk these heifers back to the paddock in a buggy and they walked back nice and calmly.

Handled With	Bikes , Dogs , Horses
Assessor Comments	Here presents an opportunity to purchase a good quality mob of PTIC heifers. These heifers would be best suited to go back out to the paddock to breed however would have enough cover to be processed if so desired. Please note the vendor has another mob of PTIC heifers (under 3 months in calf) in the same sale.
