Assessor Comments	A nice line of one-mark, quiet tempered, HICKS BLACK COMPOSITE blood 1st calvers. Heifers are developing well, exhibiting good frame & producing plenty of milk, which is evident in the sappy black composite calves at foot which are bred from sires with a reputation for high quality & performance. These heifers have been running continuously with the TeMania Angus bulls since calving. Presenting in fresh condition, these heifers are just starting to clean up in the coat with the warmer weather, & are demonstrating excellent maternal traits for their first time around, mothering up immediately when reunited with their calves after assessment, for the photos. A great opportunity to secure quality young breeders which have calved unassisted to top quality Black Composite calves at foot, most of which, will attract Angus premiums into the feedlot, & a lifetime of production ahead of them. Vendor has 18 x 18 pure Angus 1st Calvers also on offer this sale.
