Assessor Comments	Buyers opportunity to purchase young preg tested empty Drakensberger heifers. The Drakensberger is an ancient Sanga breed of South Africa, black in colour with a smooth coat, long and deep bodied medium to large framed cattle. They have heat tolerance and have great parasite resistance along with minimal eye problems. These 7 heifers (vendor also has 8 PTIC heifers in todays Eastern States) have been preg tested not detectably pregnant by local vet. If given the opportunity these girls should grow out and will suit most kill jobs or here is an opportunity to secure a small line of Drakensberger heifers to breed from. Please not 2 heifers seen with various patch of white on their udders, 1 seen with some warts on neck. Heifers are 12-15 months of age , mouthed 1 at assessment and she was sound milk tooth.
