Assessor Comments	A nice line of quiet tempered, Angus cow & calf units, on their 1st calf. These heifers are developing well, presenting in store, to forward store condition, with good frame & producing plenty of milk for their first time around, which is contributing to the high growth rate for age of the ALPINE Angus sired calves at foot. These young cows are freshening well on the available short, drying-off pick, having been purchased out of a particularly dry part of VIC, & would put considerable weight on quickly given access to more abundant pastures, which in turn, would also make them more suitable for a continued joining as the current drop of young calves mature & the cows return to a regular cycle. Calves have been marked & vaccinated at assessment, (12 heifers & 6 steers). A great opportunity to secure quality young breeders in the prime of their lives, which have calved with ease to top quality Angus calves at foot, & a lifetime of production ahead of them. A great addition to any herd.
