	4 Head Very small Fly Bite lumps on neck			
Assessor Comments	3 decks of very good quality No4 heifers that were weighed to range from 249kg to 334kg with an average of 295kg full. These 12-15 month old heifers consist of exceptional temperament and present in majority store condition. They are all vendor bred and are the progeny of a predominantly Droughtmaster cow heard and sired by Milwillah Ultrablack and Medway Droughtmaster bulls. At assessment the breakdown of breeds was approx. 70% black Ultrablack types, approx. 20% red Droughtmaster types and the remaining 10% Charolais/Simmental types. Heifers have not been joined and present a good opportunity to acquire proven performers from a herd that grows them through to heavy feeders/slaughter weights consistently.
