Temperament	Yards	Crush	Paddock
	Quiet: 7 head Slightly Stirry: 1 head	Quiet: 7 head Slightly Stirry: 1 head	Temperament not assessed in Paddock
	These steers were responsive to pressure. They were settled on the scales with only the one being unsettled. They were settled for the video (see attached) following assessing. Typical of unweaned calves to handle.		
Handled With	Bikes , Vehicles		
Assessor Comments	Offering the 2024 drop weaners off Barrabooka due to the sale of the property. The Barrabooka herd was originally developed on Tuwharetoa Angus (Tarcutta) genetics before transitioning to Hazeldean Angus approx 10 years ago. 50% of the dams in this calving were purchased ex Kenny's Creek Angus stud and these are the offspring. They are July/August 24 drop and out of large framed, big boned, deep bodied cows with presence and sired by a Hazeldean bull. They are unweaned and their mothers are being offered in today's sale also. Coordinating delivery will be required. Given the current		

summer conditions pink eye is about and the odd weepy eye would be expected at delivery. Should any not be recovering by delivery they will not be loaded. These steers are thick set with plenty of depth and the results of sound genetic investment. Suited to growing out to feeder or kill markets or to put away for the winter market. The sisters and the autumn drop weaners are being offered in today's sale.

Assessor	Henry Booth (Level 1 Accredited) Phone: 0428 375 816		
Delivery Period	01/02/2025 to 07/02/2025 (7 days)		
Delivery Point	10 kms south of Tarcutta. Murray's lane is off the Hume Hwy with the yards approx 4kms for the Hwy. Lat: -35.2775401 "S Lng147.7364086 " E
