Well weaned and well educated steers that flowed through the yards and across the scales at assessment with a minimum of fuss. Were very settled throughout the media process and I would confidently say excellent temperament weaners.

Notable Traits	Traits 1 Head Small Pinkeye Scar	
Assessor Comments	Offering 72 quality steers over two lots in this annual draft of weaners off Kelly Creek and purely split off the scales on weight in a tight weight range of 248-306kg full. This lot of 32 steers represents the younger lighter end of the offering and present in healthy fresh store condition and ready to steam ahead once shown some quality feed. Steers have been weaned 8 weeks and are up to date with their veterinary treatments. Steers are bred out of volume cows on Dunoon, Glenruben and Table Top Angus bloodlines with an AI program utilising Landfall New Ground N90 & Chiltern Park Moe genetics. Noted a very odd steer with a couple of warts on face/neck and a very odd steer with white on purse, flank or pizzle. Steers are properly weaned and educated and were a pleasure to handle throughout the assessment process. Any steers with blemishes and lighter/ tail end steers were removed at assessment Note photos and videos are of the two lots totalling 72 steers being offered in this sale.
