Assessor Comments	Offering 71 young Cows and Calves. The cows were 457kg average live at assessment after a night in the laneway the previous day. The calves at foot range in size from fresh to 7 months old and average 168kg with the lead ready to be weaned. These cows have gone forward since being moved to Muyong on agistment and have been station mated with two Angus Bulls since October. There is a variation in frame size of the cows mainly due to some smaller younger No.3 heifers in the mob that were purchased in. Overall, the mob is a nice line of young well-handled cows and calves that would suit a trade option or keep as breeders that will provide quick cashflow with calves at foot and rejoined. Please note 2 calves with pink eye treated (see photo of the worst case), also noted some older blight scarring on two cows.
