Heifers were very good to handle. Yards weren't ideal set up for assessment so working the large frame heifers down small race was a little difficult which they didn't like. They were very good in and around yards though.

Assessor Comments

A very well presented draft of PTIC Angus heifers due to calve in March to early April (per vet preg test). Heifers are very well bred being AI sired by Rainmaker or natural by Te Mania & Barwidgee blood bulls. They have been joined to a quality bull in Alpine Main Event T281 and present in magnificent order. They are very well grown, deep bodied and show the attributes to mature into very good, productive cows. A chance to acquire well bred PTIC Angus heifers to top up existing herd or foundation of new one.
