Handled With	Cows were very good to handle. Nearly all filed down race quietly and stood on platform well. Couple of head were keen to move out of confines of crush but generally they were exceptional to handle. Bikes , On foot , Vehicles
Assessor Comments	Offering a nicely bred draft of young, vendor bred PTIC Angus cows. Cows are principally Weeran blood and present in ideal calving order being mainly fresh forward store condition. Cows are a functional medium frame (a few head large frame), were very good to handle and have been joined to the Weeran Angus. They were joined for just over 6 weeks with an expected calving period of early March to mid-April. These cows are rising 2nd calf, having had their first calf weaned off in December. A hard article to find, a chance to acquire young Angus cows, PTIC to tight joining to calve March/April (NOTE: vendor offers 73 PTIC Angus females, 2yo & 3yo over 3 lots this sale).
