Assessor Comments	270 Red tag composite ewes weighing between 47kg & 67kg. These are the seconds of the 2.5years olds. A large tail was removed prior to assessing. Teaser rams were in for 10 days and removed at assessment. No ewes are being retained. There are a few ewes with black markings on their faces (see photos). They have a fair bit of leg under them, which could be the white suffolk in them, it looks like they will turn into big ewes once fully grown. They are in store condition and would respond well to supplementary feed.
