	Quiet: 5 head Slightly Stirry: 6 head These steers handled fairly well however some pushed and shoved in race, and were lively in vet crush while being weighed. They did however settle in the yard to be photographed. Behaviour not seen to be dangerous or troubling. Assessor Comments	A small but quality line of backgrounders with ample frame and genetics to grow into proper feeders and or heavy export slaughter grades. HGP free and well handled these steers should not be overlooked. These steers are located only minutes west of Tara. All neat and tidy around the head, properly castrated, and well grown these young cattle appear to be a sound investment. I recommend these Steers.
