Assessor Comments	These May-June drop Merino wether lambs have been in the feedlot for approximately two weeks and are in excellent, fresh condition, making strong progress. They are currently being fed a high-quality ration of beans and barley to promote healthy growth. While only a small number of lambs show mild scabby mouth, affected lambs will be carefully removed prior to delivery to maintain flock health. These lambs are well on their way and will continue to thrive in a new feedlot, where they will be further developed. The vendor has provided them with a solid start, offering a great opportunity for someone to take them forward for finishing.
