|                                       | Cattle handled very well to the yards and while assessing. The odd steer stirred up in the crush while isolated and settled well once back in the mob. Cattle were yarded quietly and easily with horses but have been exposed to bikes.                                                                                                                                                                                                                                                                                                                                                    |                                                             |                                     |

| Assessor Comments                     | This line of steers will continue to do well on either grass or grain. They have had a Dectomax pour-on earlier this year and a pretreatment at assessment so they are ready to go forward. These cattle have been easy to handle both through the yards and in the paddock. Please note the Vendor can only deliver Friday post sale or daylight Saturday morning. Due to delivery restraints if going into the clean these cattle will need to be cleared by the purchaser. Cattle have had a pretreatment (11.2.25) and there were no ticks visible. Vendor has another lot in the sale. |                                                             |                                     |
