Assessor Comments	On offer by "Mannion Pastoral" Ex Nundora Stn are these 77 '24 drop Angus heifers. At assessment weighed 350-508kg to average 397kg after a 12hr curfew. Sired by Larrikin, Narranmore & Granite ridge Angus bulls over Angus and very small percentage Angus cross cows with some throw back to their crosses with slight excess skin on the neck and a shinier coat. These heifers have matured well for their age with the season in the far west and present in forward condition. 10-14 months of age heifers are showing good growth and stretch for age and will develop into a nice line of cattle for the purchaser to either feed on for trade markets or join as future breeders. Although used to running in big mobs in large paddocks these cattle have been well handled showing good temperament and were a pleasure to work in the yards. Heifers are continuously running with bulls so a chance a portion may have joined. No obvious markings but small % may have slight white under belly. No heifers retained.
