|              | Steers are generally good to handle but sometimes display a little bit of run. Steers have been well handled since weaning and have settled nicely. Approximately 3 noted as slightly stirry, but in the main cattle are okay to handle. Approx 2 head were noted to be quick into crush and were keen to move out. |                         |                             |
