Assessor Comments	A line of well bred speckle park steers, January/ March 2024 drop. Sired by Speckle Park bulls out of high quality Angus cows. Two of these steers have Brangus influence in their background. They have been on natural pastures and supplemented with lick blocks, since being yard weaned in November. Generally a quiet line of steers, however a number did stir up somewhat when put under pressure in the crush. They do have a bit of spring in their step, without being aggressive. These steers present in forward store to store condition with some bigger framey steers in the mix. The Vendor also has a line of heifers in this same sale. Put the two lots together, and make up a b-double.
