Vendor Comments

Classed in breeders with later pregnancies surplus to our program. Past progeny have performed very well, both as feeders through the feedlot and breeders in the paddock. A very tight calving group of productive cows

Notable Traits	Traits 1 Head Slight old blemish in both eyes, vision isn't impaired. Ref to photos			
Assessor Comments	Quality line of 2019, 2020 & 2021 drop PTIC Angus females. Females are PTIC to commence calving mid September 2025 for approx 15 days calving. Joined to industry leading Scotts, Thomspson & Galimbang Angus sires (EBV's attached). These fertile & productive young breeders had weaners taken off at pregnancy testing (6/2/25) and have done an excellent job raising their calves. The vendor has been using the highest quality Angus genetics available in their herd with a focus on Birthweight, 600Day Weigh & IMF. The Galimbang cattle have a history of performing exceptionally well on feed and are highly sort after by repeat feedlot buyers. These females are classed in breeders, only being offered to the market due to their later calving not suiting the vendor's program. This is a not to be missed opportunity to purchase quality Angus genetics. Cattle come highly recommended!
