Assessor Comments	60 PTIC Angus Heifers that are due to start calving early August for 7 weeks. They have been joined to LBW Sterita Park Angus bulls picked for birth weight and narrower shoulders. This line of heifers present in a healthy forward store condition and have all the traits you want in a future breeder with wide hips and length of body. 100% were weighed range between 400-628kg to Ave 516kg at assessment. Vendor normally grows out weaners to feeder weighs and there no reason why these heifers won't do the same if shown the right conditions. These heifers were Vaccined with 2 shots of Pestiguard before joining. Buyers please note that the same vendor has another line of 46 PTIC heifers in the same sale (just haven't had a Pestiguard)
