Comment on Fat Score 1 Cattle	Steers display minimal fat cover generally due to recent rain and deteriorating poor season prior to rain. currently on a rising plane of nutrition, therefore strong to travel 800 km with a break required. If travelling further then 800km, after a 24 hour spell steers appear to be very capable of going further.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes						
Assessor Comments	EU Accredited, Quality line of RED Angus and Angus cross STEERS, ex "Teys Brothers" (Dams included in property transaction). An impressive line of Flatback steers offering an astute buyer the opportunity to acquire a line with plenty of frame in light condition to take advantage of a large COMPENSATORY GAIN on fresh productive pasture. Mostly good confirmation, depth and length contributing to heavy carcase dressing weights when fat. Well handled, displaying generally good temperament. Good quality, large framed feeder steers ideal to take on to background to a feedlot or grass bullocks. Approximately 5 steers in this line noted for a small blue scar on eye, not appearing to be majorly effecting vision. 3 other Mobs available this sale of the same steers to make 14 decks
