Heifers were good to handle and flowed through the yards well. A few heifers got agitated when pressure was applied in tight areas but nothing aggressive. They stood up in the crush very well, only really a hand full that played up however cattle were drafted days prior, so may have also been yards sour. Like most cattle they probably need to be steadied through gateways a little but in summary a good run of heifers that worked well in yards.

Assessor Comments	A line of genuine breeder heifers that are EU ACCREDITED, TEYS GRASSLANDS ACCREDITED and PCAS ELIGIBLE. They are No 4 Droughtmaster & Santa/Droughtmaster cross heifers that have presented in good forward store condition. These heifers stand on tremendous bone, have great weight for age considering the dry start to life post weaning. As seen by photos/videos these heifers would make a great addition to any herd looking for future breeders especially having the quality to back them whilst joining them to any bull of your choosing. These cattle also have an excellent reputation and are capable of continued growth to end up a domestic, export feeder or a grass fed heavy weight kill heifer. Due to the requirement for the purchaser to freight cattle to the clearing dip at Alpha I would suggest using a local transport operator provided they are going to a tick free area.
