	These Heifers were a pleasure to handle right throughout the drafting, weighing and photography/video process. Each Heifer stood still on the scales in the crush and waited contently then walked on when asked to move. Not docile as they moved off when asked without hurrying at anytime.														
Handled With	Bikes , Dogs , On foot , Vehicles														
Notable Traits	Traits 28 Head Bang tail heifers PTE														
Assessor Comments	A Quality line of quiet, dual purpose, pure Red Angus heifers, NSM, presenting in fresh forward store condition. This article creates a golden opportunity for the intended purchaser to obtain great genetics that will keep thriving given the correct nutrition. The Danson Family are renown for breeding proven quality genetics that always excel through feedlots or market places. These heifers provide a tight full weight range of 280-380kg with a 10% tail removed. The Danson family believe in producing moderate frame females that are quiet, easy doing/durable, high fertility & don't need the high energy intake to survive like large frame breeds allowing them to run more head per acre. Note: 4 heifers display very minor blue eye scarring in one eye which was deemed non detrimental. OPPORTUNITY PRESENTS to purchase dual purpose Red Angus genetics. "Quality young females are the future of the cattle industry." Vendor has a little lot of cows & calves in eastern states sale.
