Assessor Comments	10 x 10 mostly first calf heifers, with at least one cow being on her second calf, off some lighter country that has missed out on most of the summer rain. Given the right feed and conditions it is thought that there would be plenty of growth still in theses young cows. Mostly British & British/Euro with only one Droughtmaster cow, they are soft enough to keep producing calves suitable for most markets. Calves have been getting enough milk that they are in fair condition and not yet woody, and would greatly benefit from cows being on better nutrition. Suitable to re-join and keep as young breeders or take through to a split.
